

# **TRI-STATE TECHNOLOGIES**

*Cabling and Installation for Communication and Security*

Tri-State Technologies, Inc., is privately owned and has operated out of Freeport, NY since its Incorporation in October of 2003. We act as direct Contractors and Sub-contractors to customers in the Residential, Commercial, and industrial markets as well as State & Government Municipalities. We offer cabling and installation for communications and security. Our services include installation and maintenance of CCTV Camera Systems, Burglar alarms, Environmental Alarms, Commercial Fire Alarms, Central Station monitoring, Access Control Systems, Network Cabling and Wireless Internet configuration. Though we conduct business all over New York State our largest concentration of work is in Freeport and the surrounding towns and Villages. We currently have eight employees five of which are Freeport Residents. As business owners and residents in Freeport we aim to support all other Freeport businesses by shopping locally whenever possible and urge others to do the same.

Thank you,  
Elizabeth Boitel  
President
